| emergency procedures | Ensure adequate ventilation |
| 0 77 | Use breathing protection against the effects of fumes/dust/aerosol. |
| · 6.2 Environmental | |
| precautions: | Prevent material from reaching sewage system, holes and cellars. |
| ⁶ .3 Methods and material for | |
| containment and cleaning up | : Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). |
| | Dispose of contaminated material as waste according to item 13. |
| | Ensure adequate ventilation. |
| [·] 6.4 Reference to other | |
| sections | See Section 7 for information on safe handling |
| | See Section 8 for information on personal protection equipment. |
| | See Section 13 for information on disposal. |

SECTION 7: Handling and storage

| 7.1 Precautions for safe | |
|--|---|
| handling | Ensure sufficient air exchange and/or extraction in the work areas. Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be used to prevent the occupational hygiene limit value from being exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must be observed. The protective measures required when handling isocyanates must be observed. Avoid contact with skin and eyes and inhalation of vapours. Keep away from food and beverages. Wash hands before breaks and at the end of work and apply skin protection ointment. Store work clothes separately. Remove soiled, soaked clothing immediately. |
| Information about protection against explosions and fires: | Keep ignition sources away - do not smoke. Protect from heat. |
| | Do not store near heat sources. |

| 7.2 Conditions for safe storage, including any | |
| incompatibilities | Keep container dry and tightly closed. Further information on the storage conditions that must be observed for quality assurance reasons can be found in our technical data sheet. |
| Storage | |
| Requirements to be met by | |
| storerooms and containers: | Keep tightly closed in original packaging. Ventilate storage room well. Carefully close opened containers and store upright to prevent any leakage. |
| | Storage temperature >5°C and <30°C |
| Information about storage in | |
| one common storage facility: | May be stored together with hazardous substances of othe classes up to 200 kg. |
